**HIGH TAILORING
FOR AUTOMATION**

Innovation, quality, listening and flexibility are the values that identify our company philosophy since its birth in 1987, the year in which the Turati brothers decided to found Special E.T.A. s.r.l.

Thus was born a company dedicated to the production of "tailor-made" electrical enclosures, a company capable of giving voice to the needs of the customer, of studying and manufacturing unique and high-quality solutions.

Our story is the story of love and passion for their work that distinguishes the brothers Mauro and Gianfranco Turati. A tale of a long experience, perseverance and audacity in the choices, in-depth technical knowledge and "know-how" thanks to which today we are considered a reference company in the custom-made electrical enclosure sector.

We have always placed the customer at the centre of our work, listening to their needs and expectations. And we have always been committed to offering a superior product and service.

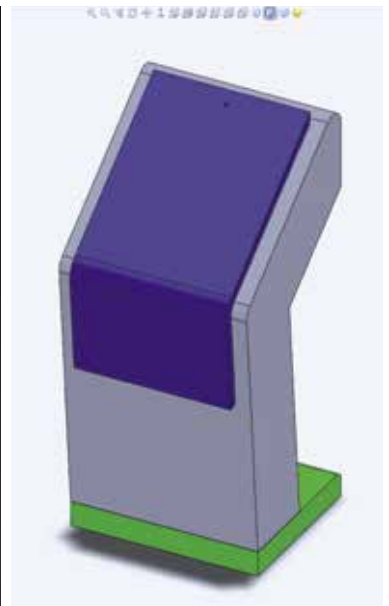

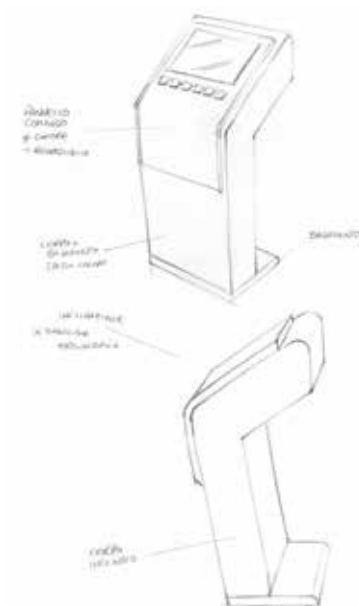

Today we present ourselves renewed.

No more Special E.T.A. rather PRIVIUS, a dynamic company that treasures its previous experience, the first that led it to be the company it is today and that boldly follows its future, without losing sight of its values.

COMPETENCE AND CREATIVITY

Our technical office and creative department are at your complete disposal both to support your projects in progress or to develop new ideas in which function and aesthetic are perfectly combined. We can study, design and manufacture a product that satisfies many customers needs starting from a drawing or a simple idea.

Below an example of a new product development process: concept, prototype and final result.

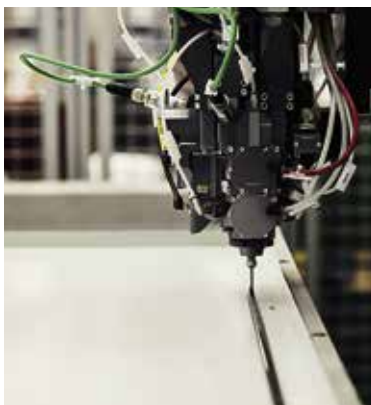

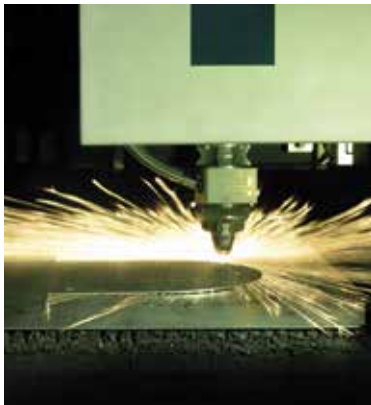

KNOW-HOW AND TECHNOLOGY

Our production stands out for its high flexibility, and manufacturing quality gained thanks to the combination of skilled employees and technically advanced processing machines.

Our production systems allow us to produce products fully "tailor-made" with custom dimensions and shapes, with drilling, fining, threading, round bending and custom finishing on cabinets, small and large boxes, control desks, pulpits and more.

COLOUR AND FINISHING

Not only "tailor-made" products with custom shape and sizes, but also custom colour and finishing. We mainly use the RAL colour palette with smooth or textured finishing, but others colour and finishing are available on request.

Give space to colour and imagination: not only one colour but also two-tone or multicoloured products.

EXAMPLE OF OUR TAILOR-MADE PRODUCTS

EXPERIENCE, COMPETENCE, KNOW-HOW AND CREATIVITY TO OFFER SOLUTIONS SUITABLE FOR DIFFERENT NEEDS.

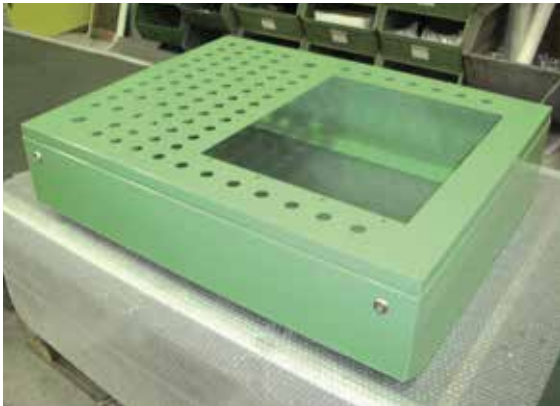

In the following pages are shown some custom made products manufactured by us.

Our product range includes:

- monobloc and modular cabinets;
 - boxes and compact cabinets;
 - monobloc and modular control desks;
 - fully tailor-made solutions.
-

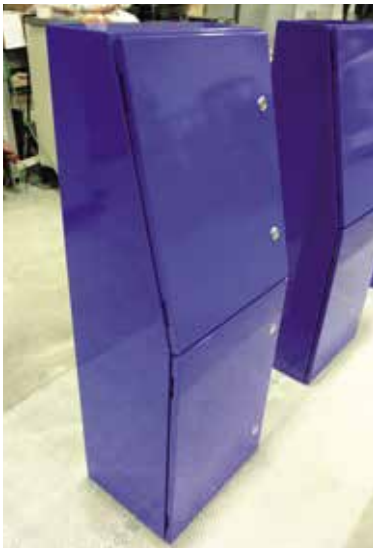

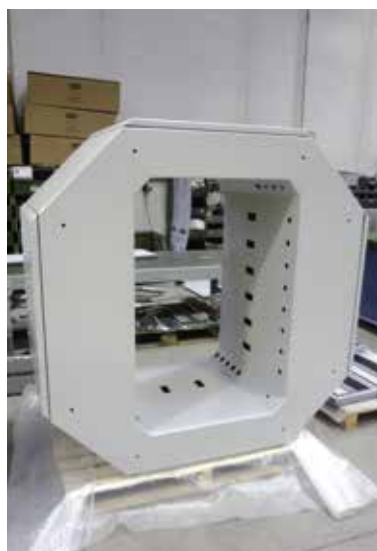

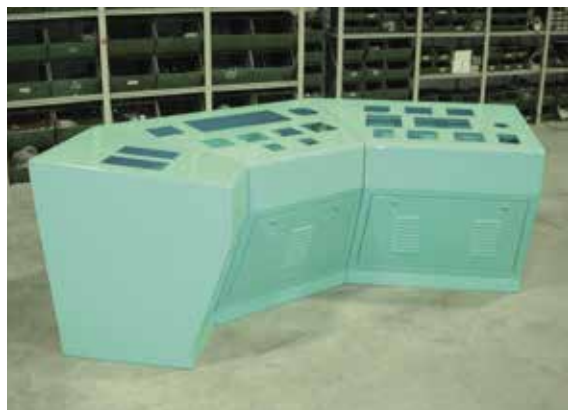

The products published are the result of the collaboration with our customers, thanks to which we continue to grow.
A special thanks to all customers who have granted us the publication of their solutions.
